About

I design digital products, build scalable design systems, and develop AI-augmented workflows that connect design and implementation.

Experience

Bcomm. Oct 2026 – Present

UX/UI Designer

- **Collaborated** with the Bcomm. creative team to design UX and interfaces for B2B corporate websites and landing pages — user flows, wireframes, and high-fidelity UI in Figma — connecting usability, visual consistency, and brand communication across client projects.
- **Built** a multibrand Figma design system for Bcomm. client brands, creating reusable components and interaction patterns that standardize UI delivery across all digital touchpoints.

Independent May 2025 – Present

Freelance Product & UX/UI Designer

- **Built** Klaro — an end-to-end SaaS tax-declaration platform for Spanish-speaking freelancers in Germany, spanning UX research through AI-assisted front-end — saving users €300–1,000/year on German tax declarations.
- **Led** a systematic UX audit plus full onboarding funnel redesign for a consumer mobile app — from conversion analytics through high-fidelity UI — achieving 2.84% download-to-paid conversion with 508% subscription growth post-launch.
- **Improved** the information architecture of Supply Pro, restructuring multi-stakeholder permission flows for restaurant operators and suppliers into a unified, navigable B2B order management experience.

Arfve — Feb – Apr 2025

Product Designer

- **Collaborated** with a 5-person design team to develop Arfve's full brand system — visual language, reusable components, and campaign standards — delivering within a 2-month engagement.
- **Led** stakeholder presentations of brand identity proposals, driving the final concept to full cross-functional approval within the defined delivery window.

Aperçu Verlagsgesellschaft — Jun 2024 – Feb 2025

Media Designer

- **Improved** print advertising performance for publisher clients, driving a 21% increase in ad sales conversions across campaign formats.
- **Managed** end-to-end production of a published book as sole responsible — typography, layout, image editing, and press-ready file delivery — shipped to press without external revision.

Hospitality — Mar 2005 – Aug 2022

Culinary Design & Systems Leadership

- **Led** kitchen operations across one-, two-, and three-Michelin-starred restaurants, managing teams of up to 5 under daily service pressure — contributing to two restaurants earning Michelin recognition.
- **Managed** training documentation and operational programmes for kitchen apprentices, translating high-complexity service processes into repeatable step-by-step systems used across 3+ restaurant teams.

Shipped

Klaro

Founder of a tax declaration platform for Spanish-speaking freelancers in Germany, helping them to save between €800 and €1,000 per year.
